Summary

MCA graduate (CGPA 8.47) with hands-on experience in Python development, full-stack web applications, and Generative AI. Skilled in building secure REST APIs and responsive interfaces with Django, FastAPI, React, and Firebase, with a working knowledge of machine learning, data analysis, and SQL/NoSQL databases. Seeking an entry-level Software Developer or Python Developer role to build reliable, production-ready software.

Technical Skills

Languages: Python, JavaScript, Java, SQL

Backend & APIs: Django, FastAPI, Flask, REST API design, Pydantic, Authentication & Session Security

Generative AI: RAG, LangChain, Hugging Face Transformers, Embeddings, Vector Search, Prompt Engineering, NLP

Frontend: React.js, HTML, CSS, Tailwind CSS, Responsive Design, i18n

Databases: MySQL, MongoDB, SQLite, Cloud Firestore

Data / ML: Pandas, NumPy, Scikit-learn

Tools & Deployment: Git, GitHub, Docker, Render, Vercel, Firebase Hosting, VS Code

Projects

AI Knowledge Assistant (RAG) | *Django, React.js, Tailwind CSS, Gemini API, SQLite* Feb 2026 - June 2026

- Built and deployed a full-stack RAG app where users upload PDF/TXT/MD files, ask questions, and receive answers and summaries with cited source excerpts. GitHub | Live Demo
- Engineered the retrieval pipeline end to end: PDF text extraction, overlapping chunking, 768-dimensional Gemini embeddings stored in SQLite, and cosine-similarity search to ground LLM answers in the uploaded content and reduce hallucination.
- Designed a REST-style Django API (upload, ask, summarize, delete) with session-based document isolation, CSRF protection, upload limits, and retry/backoff handling for API rate limits and overloads.

ElderNest – Elderly Community Platform | *React.js, Firebase, Firestore, Tailwind CSS* Dec 2024 – Feb 2025

- Built and deployed a real-time community app for old-age home residents with a social feed, friend discovery, group and private chat, events calendar, and an emergency/healthcare info page. GitHub | Live Demo
- Designed an admin-managed access model (ID/password logins mapped to Firebase Authentication) with a dashboard to add, edit, and deactivate residents, plus a friend-request flow with real-time pending-request badges.
- Secured private chats and friends-only posts with Firestore Security Rules, so content is readable only by accepted friends; implemented live feed and chat using Firestore listeners.
- Improved accessibility for elderly users with a large-text, high-contrast UI localized into six languages (English, Hindi, Kannada, Telugu, Tamil, Malayalam) using react-i18next.

Internship

Python Programming Intern July 2024 – Aug 2024

InternPe *Remote*

- Completed a 4-week program covering Python, data analysis (Pandas, NumPy), and machine learning with Scikit-learn.
- Developed spam detection and sentiment analysis models as a capstone, handling data cleaning, text preprocessing, training, and evaluation.

Education

BMS Institute of Technology and Management Bangalore

Master of Computer Applications (MCA) – CGPA: 8.47 *2023 – 2025*

Kristu Jayanti College Bangalore

Bachelor of Computer Applications (BCA) *2020 – 2023*

Certifications

Infosys Springboard: Data Structures and Algorithms in Java

CampusX: AI/ML Fundamentals
